Additional Features For Creativity + Awesomeness and Such:

- On the *custom painting website*, I added sliders that allow the user to scale the x and y dimensions of the T-Rex.

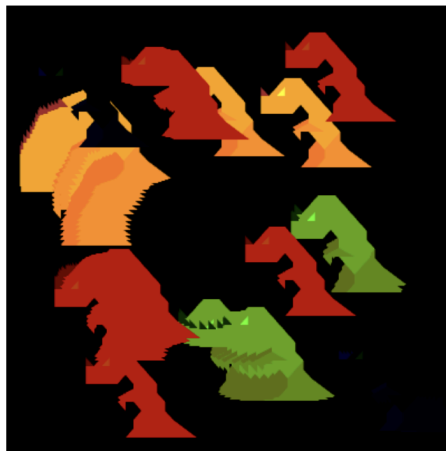

- On the *painting program website*, the shortcut color buttons that were in the videos now also change the sliders to reflect the chosen color when they didn't before.
- On the *painting program website*, I added an alpha slider that controls the transparency of the different shape brushes.

- On the *painting program website*, I added a T-Rex brush
  - The size slider can control the T-Rex's size

- The color sliders can control the T-Rex's color

- The alpha sliders can control the T-Rex's transparency
